

## **Data Scientist**

### **Missions:**

- Develop and optimize machine learning models to support business decision-making.
- Analyze large datasets to extract actionable insights and improve processes.
- Ensure data quality, integrity, and efficient storage solutions.
- Collaborate with cross-functional teams to implement data-driven strategies.

### **Profile:**

- University degree in Computer Science, Data Science, Statistics, or related fields.
- At least ten (10) years of experience in data analysis, machine learning, and AI.
- Minimum three (03) years of experience leading data-driven teams.
